DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submissions filed on 3/30/2004 and 4/29/2004 have been entered. In total, claims 1-42, 48, and 57-66 are cancelled, and claims 77-103 are added. Claims 43-47, 49-56, and 67-103 are pending.

Drawings

New corrected drawings are required in this application because they are informal and the case is in condition for allowance. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Allowable Subject Matter

Claims 43-47, 49-56, and 67-103 are allowed. The following is an examiner's statement of reasons for allowance:

Art Unit: 2828

There is not taught or disclosed in the prior art a gain medium comprising a concentrated solid of a plurality of closely packed semiconductor nanocrystals, where the gain medium provides optical gain to an optical input signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Applicant's arguments filed 4/29/2004 have been fully considered but and are persuasive. Particularly, applicant is persuasive in arguing that there is no motivation or expectation of success in combining the previous references, and that the prior art typically included nanocrystal gain media responsive only to electrical, rather than optical, input signals.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James A. Menefee whose telephone number is (571) 272-1944. The examiner can normally be reached on M-F 8:30-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Don Wong can be reached on (571) 272-1834. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
